ADMISSION RATES--ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES - 1944, 1945, 1946

WEEKLY MORBIDITY REPORT

RESTRICTED

CURRENT TRENDS
Week Ending 3 August 1946

The annual admission rate for All Causes was 508 per 1,000 strength or 2.7% lower than the comparable rate a week ago. A year ago the rate for All Causes was 588. The decrease reported for the week was offset by increases in the 4th, 8th, 11th and 12th Districts and the River Commands. The 6th District, though decreasing 7% this week, remained high with a rate of 656 while the 12th District and the River Commands were low with a rate of 392. Six Districts have weekly rates below the continental average.

The combined rate for Respiratory Diseases which began to increase last week continued the trend this week with an additional 7.7% increase to 86.3. The current rate, however, compares favorably with the comparable rate of a year ago which was 128.2. The most significant increase, 137%, was reported by the 4th District. The 11th District which last week increased 63%, this week increased another 22% and is now second high among the continental Districts with a rate of 129.3. The 3rd District showed the greatest improvement with a decrease of 39%.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The combined rate for these two diseases is still on the upgrade with a weekly rate of 48.3 which is 9.3% higher than the rate of the previous week, 44.2. The rate reported a year ago was 86.8. Six Districts showed an increase this week; however, the total increase was contributed to mainly by the 4th District whose rate spurted upwards 526%. The 6th District is high with a rate of 96.5, and the 13th low with a rate of 5.9.

PNEUMONIA-BRONCHO AND LOBAR. The rate for these diseases remained stationary this week at 0.6 which remains well below the rate of a year ago which was 1.3. Cases were reported by only the 5th, 6th, 11th and 13th Districts and the Potomac and Severn River Commands. Of these only the 11th District reported incidence last week.

PNEUMONIA, ATYPICAL. Increasing 130.4% this week to 5.3 the rate for this disease is now more than twice higher than the rate a year ago which was 2.3. Six Districts reported cases this week. Of these the 1st and 3rd Districts reported no cases last week. The rates for the 5th and 11th Districts accounted for the total increase by being 323% and 119% higher than a week ago.

TONSILLITIS AND PHARYNGITIS, ACUTE. The admission rate for these infections continued to drop this week and currently stands at 32.0, a new low for the year. Last week the rate was 32.9 and a year ago 38.4. Seven Districts reported decreases this week, but contrarily the 1st and 4th Districts showed marked increases of 84% and 108% respectively.

SCARLET FEVER. This diagnosis increased 20% this week, the rate being 0.6. A year ago the rate was 1.9. Cases were reported by only the 5th and 11th Districts; however, those cases in the 5th Districts represented a 229% increase over the previous week's rate.

MEASLES. With cases reported by only the 5th and 8th Districts and the River Commands, the current rate for this disease now stands at 1.0 which is 33.3% lower than for last week. The corresponding rate a year ago was 1.5. The River Commands who reported no cases last week now have a rate of 1.2 for the disease.
